

# Global Classrooms and UMD Campus Race and Gender

## Races of Global Classrooms Students

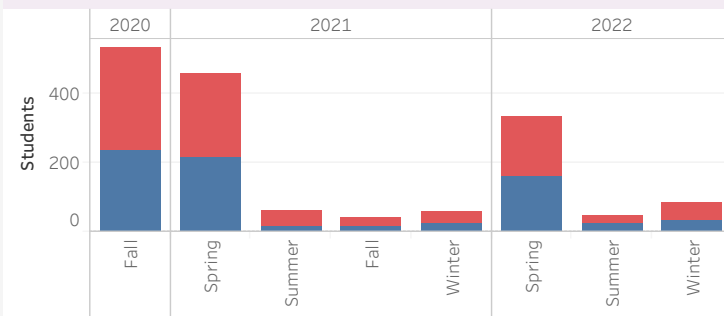

## Races of UMD Students

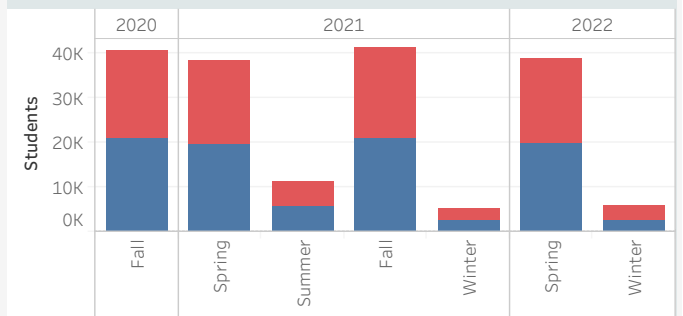

**Term**  
 Fall  
 Spring

Both schools have a predominant population of White students. However the percentage of Hispanic students is greater in Global Classrooms compared to UMD's student body. UMD also has a more prominent population of Pacific Islanders and American Indian compared to Global Classrooms' student body.

## Gender of Global Classrooms Students

## Gender of UMD Students

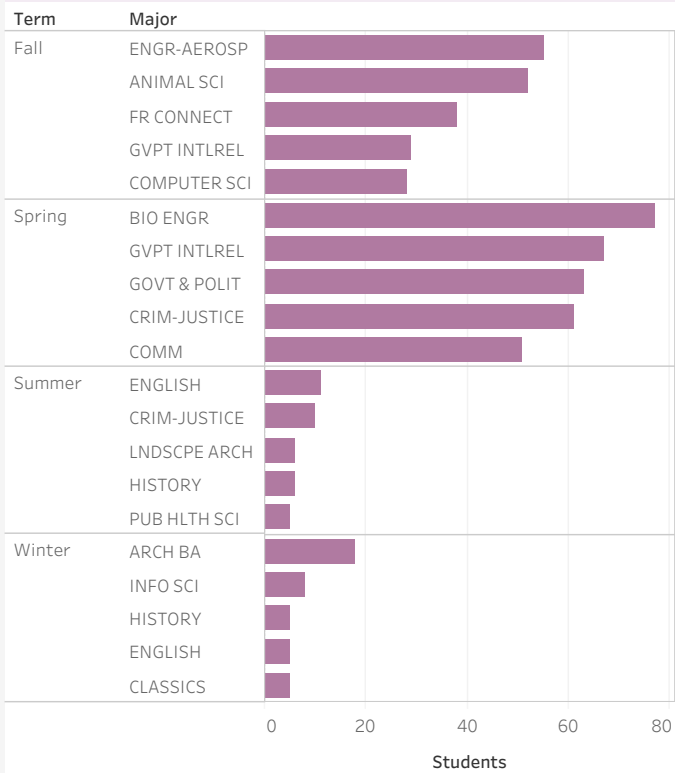

**Gender**  
 Female  
 Male

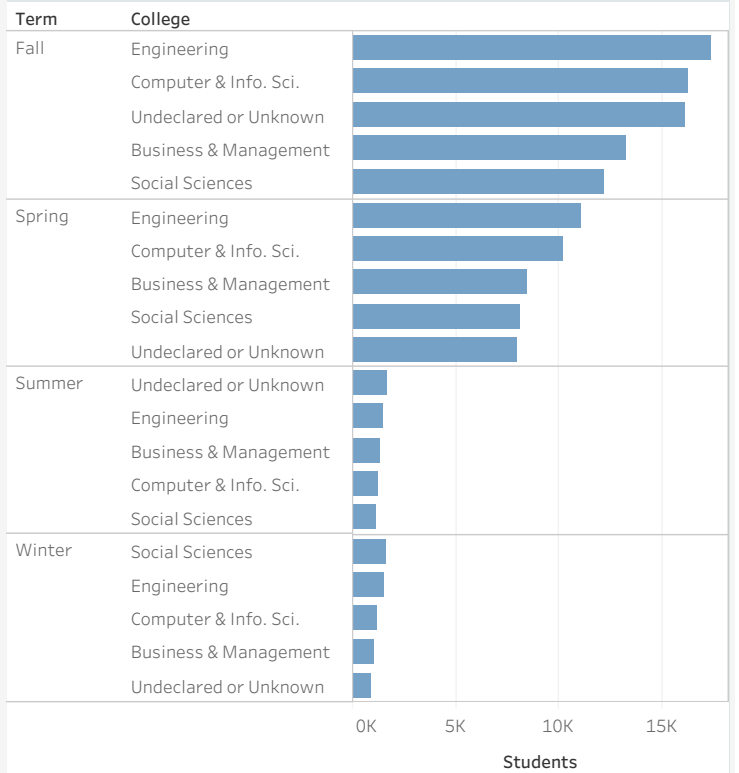

Global Classrooms had a slightly greater percentage of female students for every term, and UMD had a slightly greater percentage of male students for every term except for winter. Global Classrooms also had a noticeable drop in overall student attendance after Spring 2021, can be attributed to factors such as UMD classes returning to in-person classes...

## Global Classrooms and UMDs' Top 5 Student Majors by Term

### Global Classrooms

### UMD

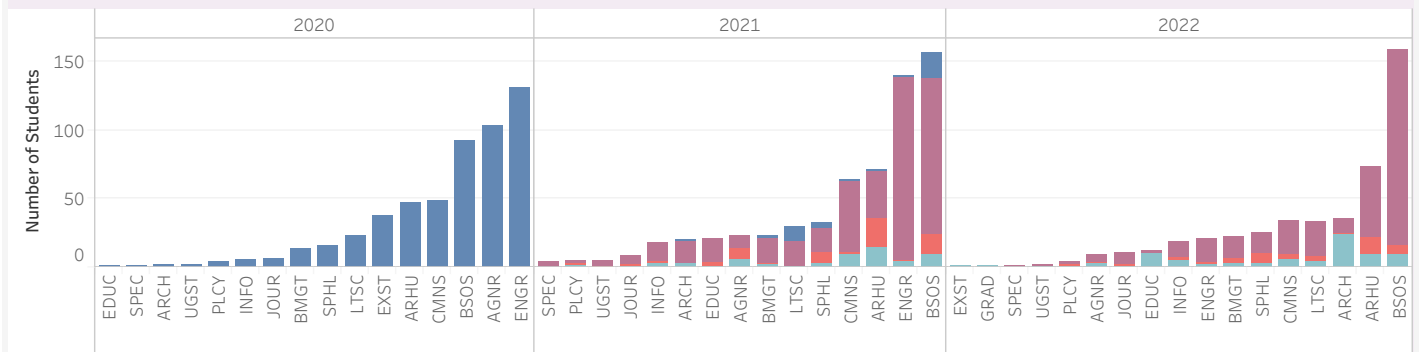

In both Global Classrooms and UMD, students majoring in engineering fields were the most prominent majors during the Spring and Fall semesters. However Global Classrooms had more variety in their top 5 majors, with majors coming from the College of Arts and Humanities, College of Behavioral and Social Sciences, and the School of Architecture. UMD maintained the same top 5 majors throughout all terms.

# Global Classrooms and UMD Students' College by Year and Term

**Term**  
 Fall  
 Spring  
 Summer  
 Winter

While UMD had equal numbers of attendance for each term and college, Global Classrooms had significantly more attendance during their Spring semesters by all majors. The majority of Global Classrooms' student body comes from the College of Behavioral and Social Science. Global Classrooms also had a greater number of students from within the Architecture School, College of Arts and Humanities, and College of Behavioral and Social Sciences attend during Summer and Winter terms. A majority of UMD's students are within the James Clark School of Engineering, College of Computer, Mathematical, and Natural Sciences, and the College of Behavioral and Social Science. Their stats remain the same throughout all terms and years, but in Winter 2021 there was a significant increase of students from within the School of Public Policy.
